BEFORE USING THIS PRODUCT PLEASE READ THE LABEL CAREFULLY

WONDERSOL All Purpose is an organically based growth stimulant and plant stress management product which can be applied to all gardens in caring for plant, tree and lawn health.

WONDERSOL All Purpose is a balanced liquid plant food that is specially formulated to contain macro- and micro nutrients. The product has plant growth stimulating properties due to Kelpak (Reg. No. L2414) that promote growth stimulation and nutrient complexing and plant uptake enhancement properties due to added fulvic and amino-acids.

WONDERSOL All Purpose contains the whole range of macro- and micro elements. Other biological active organic components are amino acids, organic acids (complexing agents), natural hormones (cytokinins and auxins) which encourage maximum growth.

FEATURES AND BENEFITS:

- Growth Stimulant due to natural auxins, cytokinins and gibberellins from Kelpak (L2414).
- Suitable for use on all plants and foliage e.g seedlings, groundcovers, shrubs, trees, creepers, lawns and hydroponics.
- Organically based and environmentally friendly and safe to use.
- Foliar Feed – easy to apply.
- Plant Stress Protector due to presence of essential micro-nutrients which are part of the anti-oxidant biochemical pathway.
- Can be used on all alkaline or acid loving plants.

DIRECTIONS FOR USE:

SHAKE CONTAINER WELL BEFORE USE.

DO NOT LEAVE DILUTED MIXTURE IN SPRAYER FOR LONGER THAN 24 HOURS

- Shake container well before use.
- Highly concentrated. Do not apply more than 2 % concentrate (20mℓ/liter) when spraying directly on the leaves of plants or when applying as a drench to plants. Dilute 20ml in 1liter water
 - POTPLANTS: Mix WONDERSOL All Purpose with water and water plants as normal. Repeat every 14 days. More frequent applications are sometimes desired and this will not harm plants if mixed according to the instructions.
 - GENERAL APPLICATION: Apply WONDERSOL All Purpose weekly to the root zone or directly onto leaves during stages of rapid growth and immediately after plants have suffered from stress related factors during transplanting or dry conditions at weekly intervals for of up to four weeks.
 - FOLIAR APPLICATION: Spray diluted WONDER™ SOL up to medium wetting point. Use 20ml diluted in 1ℓ of water of WONDER™ SOL at a rate of 5 ℓ per square metre of vegetable patch.
 - Guidelines for direct foliar spraying:
 - 500 mℓ WONDERSOL All Purpose, 25 ℓ water /500 m²
 - 200 mℓ WONDERSOL All Purpose, 10 ℓ water /200m²
 - 20 mℓ WONDERSOL All Purpose, 1 ℓ water / 20 m²
 - NURSERIES: For seed germination, transplanting of seedlings, re-potting, planting of young plants, cuttings, trees, shrubs etc. Mix WONDERSOL All Purpose with water at the same dilution as above and use as watering liquid on seed beds after sowing, repeat at 14 day intervals. Whenever re-potting or transplanting plants use the same mix to water plants in the root zone as well as the foliage.
 - HYDROPONICS: Dilute 5 ℓ of WONDERSOL All Purpose into 1000 ℓ of water. Repeat application during the first 4 days and then every 7 days. Check your system with regular intervals for biological oxygen demand, flush and replenish with fresh solution if required.

- WONDERSOL All Purpose can be applied through a Nutrigator™ or Fertigator as part of the normal feeding programme for your garden at the rate of 5 ℓ concentrate WONDER™SOL per 1000 litres of feed.
